

VenusLiv

Tap for Endless Streaming

Experience uninterrupted streaming with the VenusLiv camera! Say goodbye to frame stuttering and unexpected shutdowns caused by overheating issues, thanks to its advanced aerospace-grade heat dissipation system. With RTMP support, you can easily stream to Facebook, YouTube, Twitch, or various other platforms. The built-in UVC ensures smooth video streaming without the need for external capture cards. Powered by HollyOS, the VenusLiv offers an intelligent and user-friendly experience, giving you complete control over exposure, ISO, white balance, and aperture. The VenusLiv offers real-time autofocus, horizontal and vertical live streaming and recording, color correction magic, precise zoom capabilities, and flexible connectivity options.
