

PIXEM 2

The best auto-follow camera for **individual sports** and **stage**

Horse riding . Conferences . Agility . Pastor . Ice skating . Athletics . Etc.

A camera on a tripod is positioned in the foreground, with a blurred background of a sports field and people. The entire image has a warm, orange-red color overlay.

For sports

Film your training sessions without a cameraman.

More **video coaching**

Improve up to 5 times faster

More **communication**

Sharing, videos, social media

A man in a patterned shirt is speaking into a microphone on a stage. The background is blurred, showing other people. The entire image has a warm, orange-red color overlay.

For the stage

No more static videos that put you to sleep. Film your **teacher, lecturer, evangelical pastor**, with the best auto-follow camera on the market.

This technology is incredibly valuable to both athletes and coaches, and provides a platform to receive real-time instruction and feedback remotely, which is an incredible asset to not only our elite athletes, but also many of our members,” said Bill Moroney, CEO of US Equestrian. “We see this as a beneficial asset that can help continue development in sport through expanded accessibility to coaching and learning.

Bill Moroney, CEO of US Equestrian,
USA

I love to use it during Agility training. It's a perfect way to have great video material for a detailed analysis of my agility sessions and no-one has to be around to film.

Linda Köhler, Agility, Allemagne

We are grateful for using this product for our purposes in our church.

Tim Rigdon, Pastor, USA

Enjoy at last the benefits of videos

as PIXEM 2 will have you filming much more often

Horse riding

analyze your posture

Conferences

captivate your audience

Pastor

make your speeches
more dynamic

Ice skating

share your passion

Agility

a faithful friend for
perfect videos

Athletics

capture your
achievements

And get coached remotely

Your coach sees you in real time...

...and gives you instant feedback in your headset

Proven technology

MOVE 'N SEE was the first company in the world to design auto-follow cameras. It has an unequalled lead. We equip the most famous federations, such as the American Equestrian Federation, who made it its official training tool.

with a 330ft / 100m range

The **most powerful tracking** on the market

More reliable than image recognition. The robot can't lose you even if there are several people in the action area. No problem with colors or shapes of the tracked subject. Whatever the light conditions and even in the dark, **the robot always follows you.**

PIXEM 2 use a radio triangulation technology that positions the watch 10 times per second, even better than GPS.

Place the three small beacons between 1m and 2m high around your playground, turn everything on, and let's go!

Easy to use

Start/stop recording from the watch anytime

Watch or edit your videos with any software

Automatic zoom

Choose the size of the frame (e.g. 4m on each side of you), and the zoom will keep that when you move away from or closer to the robot.

This **automatic zoom** works for cameras, smartphones and tablets.

Works as well indoor as outdoor

OUTDOOR

INDOOR

PIXEM 2

For cameras, smartphones & tablets

- Indoor and outdoor tracking
- Range of 330ft / 100 meters
- Designed for your smartphone and tablet, even 4k models

Why trust us?

Official supplier

MOVE'N SEE

the first company in the world to create a robot cameraman in 2011

French quality

Made in France - Multilingual Customer support - 2 years warranty

MOVE'N SEE

" We launched the PIXEM robot at CES Las Vegas, all athletes and hosts were very enthusiastic upon discovering the first technology in the world that allows filming without a cameraman. PIXEM became the official training tool of the American Equestrian Federation, and it equips thousands of churches and schools. Its phenomenal technical advancement is the best tracking quality with the best image quality! Thank you!"

Eric Willemenot

Move'N See CEO & founder
