

Pro Series

# Century Lens Accessories for Sony HVR-Z1U & HDR-FX1 HDV Handycam® Camcorder

Century's Pro Series offers quality professional lens accessories designed to help you go wider, reach further, and move in closer than the lens on your HDV Handycam® alone allows. Century's superb optics provide the finest professional images. These state-of-the-art add-ons minimize chromatic aberrations and unwanted distortion and produces images that are ultrasharp edge-to-edge. Featuring a bayonet mount, Century's accessories interface directly with the bayonet mount at the front of the lens so mounting and removing is quick and easy.

## .6X Wide Angle Adapter

VS-06WA-HDS

Lightweight and cost-effective, the .6X Wide Angle Adapter increases coverage by 40%. This add-on is ideal for shooting situations in which full zoom isn't needed. The Pro .6X Wide Angle Adapter offers a much wider angle of view with very low distortion. Partial zoom only.

## .7X HD Wide Angle Converter

VS-07CV-HDS

The right tool for shooting situations that require both a wider angle of view & full zooming capabilities. This professional add-on lens produces crisp, high resolution images with low distortion, and superior contrast edge to edge. The .7X HD Wide Angle Converter attaches to the front of the lens for 30% more coverage when set to wide angle, telephoto or anywhere in between.

## .3X Ultra Fisheye Adapter

VS-FE3X-HDS

The .3X Ultra Fisheye Adapter offers the widest angle of view & eye-popping distortion with superior edge-to-edge resolution. With its unmistakable style, this adapter is a must for extreme sports shooters.

## Fisheye Adapter

VS-FEWA-HDS

Add the Fisheye to the front of your lens for a wider angle of view & a remarkable degree of barrel distortion with no vignetting. The Fisheye exaggerates depth, pulling nearby objects closer and causing distant objects to recede into the background. The Fisheye allows for partial zoom—but you'll want to stay at the wide end of the range anyway, for the most pronounced effect.

## 1.6X Tele-Converter

VS-16TC-HDS

Extend the reach of your zoom without exposure loss. The 1.6X Tele-Converter is a front-mounted accessory that also provides greater telephoto reach. Use it to instantly shift the focal length range of your camera in the telephoto direction. The perfect tool when it's inconvenient, dangerous or impossible to move as close to the subject as you'd like.

## Achromatic Diopters

AD-7220, AD-7235

For maximum magnification and image clarity, these Macro Zoom Attachments offer more close-up range, while preserving zoom capability. Ideal for focusing tightly on small objects in tabletop, miniature, and flat field work. In +2.0 and +3.5 strengths. Stackable for even greater magnification.

## Wide Angle Sunshade/Filterholder

VS-SS05-00

Designed for use with the .7X HD Wide Angle Converter. This lightweight, 105mm Clamp-on sunshade is a cost-effective means of light management for Sony HDV camcorders. Offers a provision for (1) 4"x4" glass filter in a holder. Weighs only 6.5oz.

## DV Matte Box MKII 4x4 Filter System

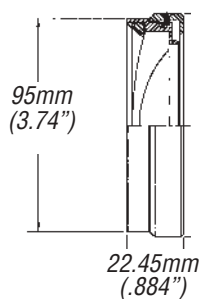

Century Compact and Wide Angle DV Matte Box MK II Systems for Sony HDV camcorders. Compatible with Century lenses. Choose cine-style rails or clamp-on features.
